

Metalys Enclosures Manufacturing W.L.L.

Precision Sheet Metal Engineering • Fully Assembled Switchgear Solutions

Engineered in Qatar • Built for the GCC

Design Direction

A World-Class Industrial Brand

Audience

EPC & MEP contractors, panel builders, utilities, consultants, and industrial developers across Saudi Arabia and the GCC.

Objective

Position Metalys as the preferred precision manufacturing partner for industrial enclosures and fully assembled switchgear.

Standard

Executive-level presentation quality — premium, modern, engineering-driven, and globally competitive.

Who We Are

Driven by Precision. Defined by Purpose.

Metalys Enclosures Manufacturing W.L.L. is driven by a clear mission: to become the leading precision sheet metal manufacturer in the region, pioneering innovation in industrial enclosures. Our engineering philosophy centers on customer-first manufacturing, continuous innovation, and uncompromising quality at every stage of production.

Metalys At A Glance

Key Metrics & Capabilities

20+

Years of Experience

Precision sheet metal engineering in Qatar

5K+

sq.m. Facility

Modern, fully equipped manufacturing plant

6+

GCC Countries

Active regional supply and delivery network

500+

Projects Delivered

Across industrial, utility, and infrastructure sectors

100+

Skilled Workforce

Engineers, fabricators, and assembly technicians

ISO

Certified & IEC Compliant

Factory Acceptance Testing on every project

Our Manufacturing Capabilities

Engineered for Every Application

Low Voltage Switchgears & VFD Panels

Precision-built LV assemblies and variable frequency drive enclosures to IEC standards.

Custom Sheet Metal & Stainless Steel Panels

Complex fabrications in mild steel, galvanized, and marine-grade stainless steel.

Euro Enclosures & Meter Panel Boards

Standardized and custom metering solutions for utilities and infrastructure projects.

Instrumentation & Control Panels

High-precision panels for process control, SCADA, and automation environments.

Bridge Consoles & Battery Racks

Marine-grade consoles and robust battery rack systems engineered for demanding environments.

Strategic Expansion

Fully Assembled Electrical Solutions

Metalys now delivers complete, ready-to-install electrical assemblies — from raw enclosure to fully wired, tested, and labeled switchgear systems. Every unit leaves our facility site-ready, eliminating on-site assembly risk and reducing project timelines.

Busbar Assembly

Precision copper and aluminum busbar fabrication and installation to specification.

Electrical Wiring & Component Integration

Full internal wiring, breaker mounting, and component integration by certified technicians.

Labeling, Testing & FAT

Complete labeling, functional testing, and Factory Acceptance Testing before dispatch.

End-to-End Manufacturing Process

From Raw Material to Site-Ready Delivery

Raw Material

Engineering

CAD Design

Laser Cutting

CNC Bending

Every stage of our process is controlled, documented, and quality-verified — ensuring dimensional accuracy, material traceability, and electrical compliance from first cut to final delivery.

Factory & Technology

Precision at Every Stage

CNC Laser Cutting

High-speed fiber laser cutting for complex profiles with micron-level accuracy.

CNC Press Brake Forming

Programmable bending for consistent, repeatable precision across high-volume runs.

Marine-Grade Welding

Certified welders delivering structural integrity for the most demanding environments.

Eco-Friendly Powder Coating

Electrostatic powder coating for superior corrosion resistance and premium finish.

Quality Assurance

Zero Compromise. Every Unit.

Our QA Framework

- Dimensional accuracy verification at every stage
- Material traceability from certified suppliers
- Electrical verification and insulation resistance testing
- Factory Acceptance Testing (FAT) on all assemblies
- IEC standard compliance documentation
- Continuous quality improvement protocols

Our Commitment

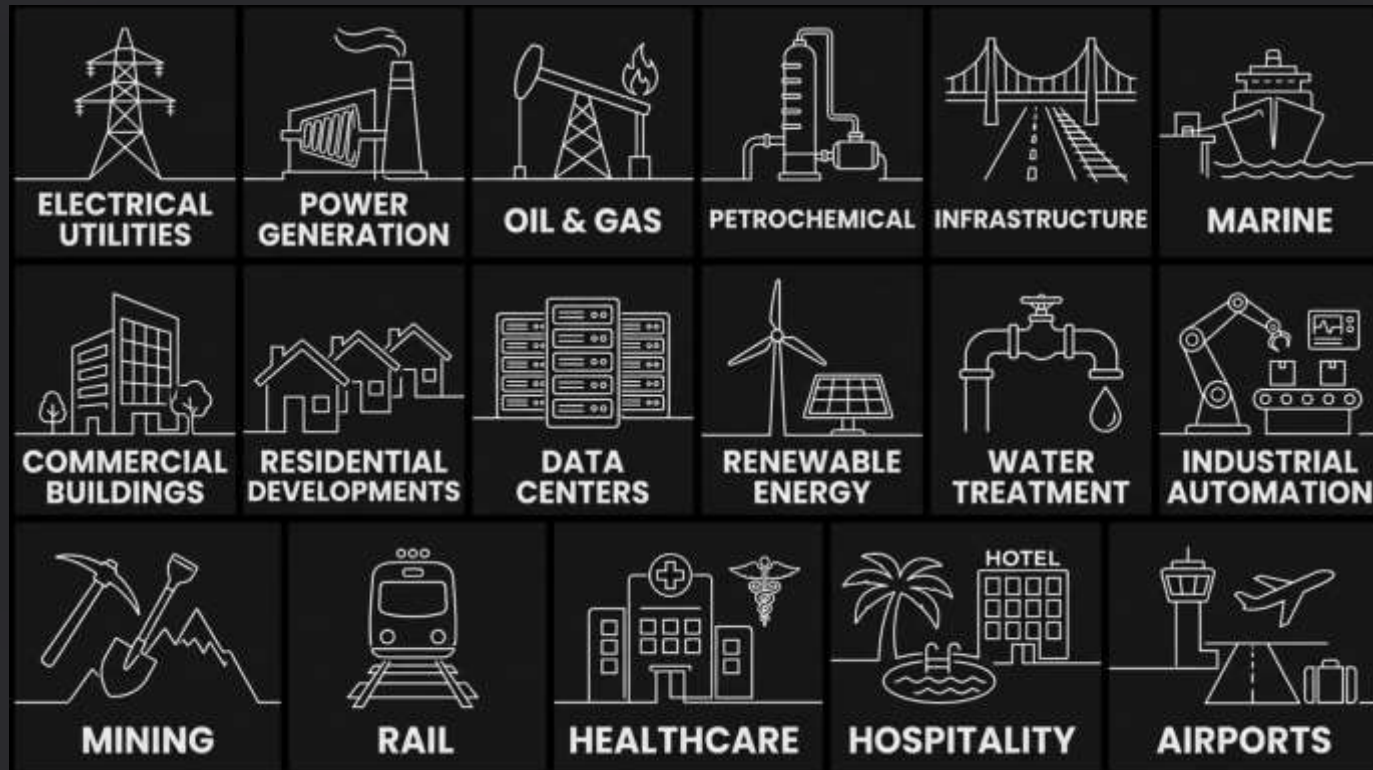

Every enclosure and switchgear assembly undergoes rigorous multi-stage inspection before leaving our facility. Our quality management system ensures that each unit delivered meets or exceeds the engineering specification — with full documentation for client records and regulatory compliance.

- ☐ IEC-compliant testing and FAT documentation provided on every project.

Industries We Serve

Built for the World's Most Demanding Sectors

From offshore oil platforms to urban data centers, Metalys enclosures and switchgear solutions are engineered to perform in the most demanding environments across the GCC and beyond.

Product Gallery

Our Product Range

LV Switchboards & MCC

Motor control centers and main distribution boards to IEC standards.

Outdoor & Floor Standing Enclosures

Weatherproof and floor-standing enclosures for harsh outdoor environments.

Stainless Steel & Wall Mounted

Marine-grade stainless and wall-mounted solutions for hygienic and compact installations.

Marine Consoles & Battery Racks

Purpose-built consoles and battery containment systems for marine applications.

Strategic Advantage

Why Source From Qatar

Faster Delivery to Saudi Arabia

Direct road transportation eliminates overseas shipping delays and customs complexity.

Competitive GCC Pricing

Regional manufacturing cost advantages without compromising on quality or specification.

Flexible & Rapid Production

Short lead times, rapid customization, and scalable capacity for urgent project requirements.

Arabic & English Support

Bilingual engineering and commercial teams ensuring seamless regional communication.

Competitive Positioning

Why Choose Metalys

Capability	Metalys	Typical Supplier
Custom Engineering & CAD Design	✓ Full in-house	Limited
Complete Electrical Assembly	✓ End-to-end	Enclosure only
Factory Acceptance Testing (FAT)	✓ Every unit	Optional / extra cost
Fast GCC Turnaround	✓ Regional logistics	Overseas lead times
Flexible Production Runs	✓ 1 to 1,000+ units	Minimum order constraints
Dedicated Engineering Support	✓ Project lifecycle	Sales-only contact
Premium Powder Coat Finish	✓ In-house coating	Outsourced

Partnership Model

Built for Every Type of Partner

Who We Support

→ Panel Builders & OEMs

Overflow, private label, and contract manufacturing at scale.

→ EPC & MEP Contractors

Project-based manufacturing with engineering coordination from day one.

→ Utilities & Government Projects

Long-term supply agreements with consistent quality and documentation.

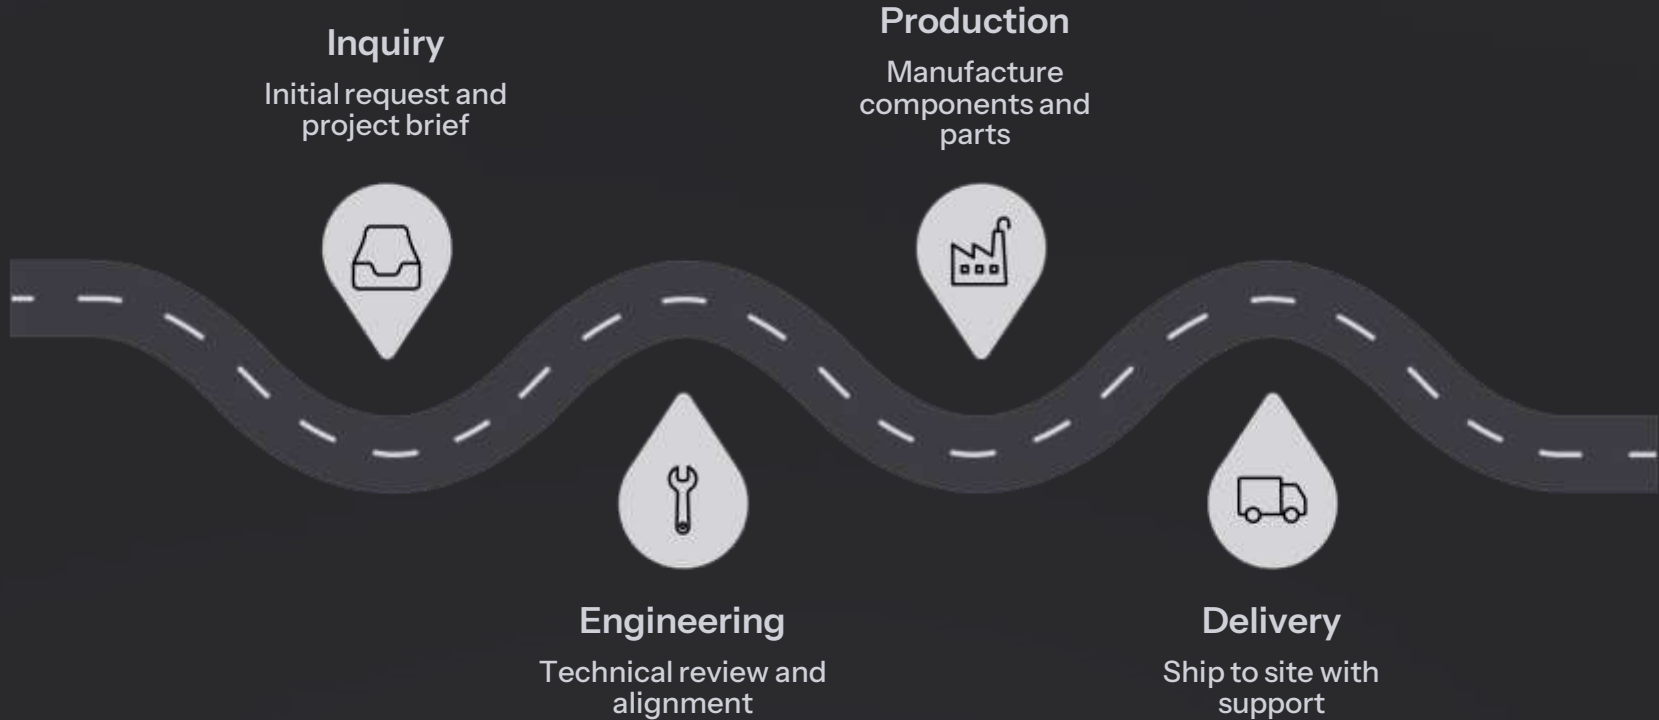

→ System Integrators

Custom enclosures and fully assembled panels integrated to your specification.

Partnership Formats

- OEM Manufacturing
- Private Label Manufacturing
- Overflow Manufacturing
- Contract Manufacturing
- Project-Based Manufacturing
- Long-Term Supply Agreements

A Seamless Process from Inquiry to Delivery

Our structured project approach ensures full transparency, engineering alignment, and on-time delivery — with dedicated support at every stage from initial inquiry through to post-delivery after-sales service.

Strategic Value Proposition

Six Reasons to Partner with Metalys

Reduced Lead Time

Regional manufacturing and road logistics cut delivery timelines significantly.

Lower Manufacturing Cost

Competitive GCC pricing without sacrificing engineering quality.

Premium Finish

In-house powder coating and surface treatment to the highest standards.

Engineering Support

Dedicated engineers supporting your project from design to delivery.

Flexible Production

Scalable capacity from single units to large-volume project orders.

Reliable Delivery

Consistent on-time delivery backed by a robust regional supply chain.

Future Vision

Leading GCC Manufacturing. Powering the Region's Future.

GCC Manufacturing Leader

Expanding our footprint as the region's most trusted precision enclosure manufacturer.

Supporting Vision 2030

Aligned with Saudi Arabia's industrial development and infrastructure ambitions.

Innovation-Led Growth

Continuously investing in technology, talent, and manufacturing capability.

Middle East Expansion

Delivering innovative industrial solutions across the broader Middle East region.

Chapter Summary

The Metalys Difference

"Precision-engineered enclosures and fully assembled switchgear solutions — engineered in Qatar for regional and global markets."

Engineering & CAD Design → CNC Fabrication

Every project begins with rigorous engineering review and precision CNC manufacturing.

Full Electrical Assembly → Rigorous Testing

Complete busbar, wiring, and component integration followed by FAT on every unit.

Site-Ready Delivery → Long- Term Partnership

Reliable regional logistics and dedicated after-sales support for every client.

Sectors at a Glance

Trusted Across Critical Infrastructure

Energy & Utilities

Power generation, electrical utilities, renewable energy, and water treatment facilities.

Oil, Gas & Petrochemical

Hazardous area enclosures and control panels for upstream and downstream operations.

Infrastructure & Buildings

Airports, rail, commercial towers, hospitals, hospitality, and residential developments.

Marine & Industrial

Marine consoles, mining, industrial automation, and data center power distribution.

Certifications & Compliance

Standards That Speak for Themselves

Compliance Framework

Metalys designs and manufactures in accordance with internationally recognized standards, ensuring every product is accepted by engineers, consultants, and authorities across the GCC and beyond.

- IEC 61439 — Low Voltage Switchgear & Controlgear Assemblies
- IEC 60529 — IP Ingress Protection Ratings
- ISO Quality Management System
- Factory Acceptance Testing (FAT) documentation
- Material traceability and certification records

Our Quality Promise

Every enclosure and assembly is manufactured, inspected, tested, and documented to the highest international standards — giving our clients full confidence in every unit we deliver.

- 📄 Full FAT documentation and compliance certificates provided with every order.

Let's Build Together

Building the Future of Industrial Manufacturing Together

Metals Enclosures Manufacturing W.L.L. — your trusted partner for precision-engineered enclosures and fully assembled switchgear solutions, engineered in Qatar for regional and global markets.

Doha, Qatar

Strategically located for fast road delivery across Saudi Arabia and the GCC.

Precision Sheet Metal Engineering

CNC laser cutting, press brake forming, welding, and powder coating.

Fully Assembled Switchgear

Complete busbar, wiring, testing, and site-ready delivery.

OEM & Project Partnerships

Flexible manufacturing models for panel builders, EPC, MEP, and utilities.

Metalys Enclosures Manufacturing W.L.L.

Precision. Quality. Partnership.

Inquiries & Partnerships

Reach our engineering and commercial team for project discussions, quotations, and partnership opportunities.

Doha, State of Qatar

Manufacturing facility and headquarters — serving Saudi Arabia, UAE, Kuwait, Oman, Bahrain, and the wider GCC.

Engineered in Qatar. Built for the World.

Precision sheet metal engineering and fully assembled electrical switchgear solutions for regional and global markets.
